Investment universe

M Convertibles SRI invests in « pure » convertible or exchangeable bonds.

Presentation

The objective of **M Convertibles SRI** fund, which is based on european bond and equity markets, is to outperform the Refinitiv Europe Convertible Hedged (EUR) index over the medium term, through discretionary investment management.

The **M Convertibles SRI** fund aims to capture equity market upside, whilst benefiting from the defensive aspect provided by the bond component of its investments, which mitigates downside market risk.

The **M Convertibles SRI** fund's investments are managed on a discretionary basis. The portfolio managers apply a multi-criteria stock picking approach, combining equity upside potential, credit risk and the technical profile's analysis of convertible bonds.

M Convertibles investment process integrating ESG criteria, focus on **pure Convertibles Bonds**.

The **M Convertibles SRI** portfolio construction process is based on **five key tenets** :

Risk indicator - SRI

Risk associated with discretionary investment management • Risk of loss of capital • Convertible bonds risk • Equity risk • Volatility risk • Interest rate risk • Credit risk • Sustainability risk • High yield market risk • Risk on subordinated securities • Derivatives market risk • Default risk • Foreign exchange market risk • Liquidity risk • Small caps risk.

* The performance of the UCITS (net coupons reinvested) is compared to the performance of the Exane Eurozone Convertible index until 26 October 2022, then to the Refinitiv Europe Convertible Hedged (EUR) index.

*Benchmark. The reference to this index does not constitute an objective or a limitation in the management and composition of the portfolio, and the Fund does not restrict its universe to the components of the index.

M Convertibles SRI

PORTFOLIO

During the summer, investor sentiment fluctuated between fears of a slowdown and the return of the "Goldilocks" scenario. Expectations of short-term rate cuts accelerated, and long-term rates dropped significantly. Earnings reports were quite mixed, with some offering very favorable outlooks and others delivering more cautious messages. In this context, equity indices exhibited varied performances depending on their geographical regions and sectoral biases.

European convertible bonds made gains. The primary market saw three issuances in July-August: Tui 1.95% 2031, Ocado 6.25% 2029, and Leg Immo 1% 2030. We participated in two of these. In the secondary market, we reduced our positions in Redcare 0% 2028 and Qiagen 1% 2024, fully exited Ocado 0.875% 2025, and tendered Tui 5% 2028. We also established a position in MTU Aero 0.05% 2027.

FOCUS: LEG IMMOBILIEN

SDG 8

LEG

LEG Immobilien is one of the leading players in the real estate market in Germany. Specializing in the management and development of residential properties, the group owns and manages approximately 166,500 rental apartments, primarily located in North Rhine-Westphalia, a region known for its attractiveness.

In a less favorable macroeconomic environment in recent months, the group has shown resilience. Despite a slight decrease in rental income in the first half of 2024 compared to the previous year, LEG is exhibiting positive momentum with an increase in rents (+3% like-for-like) and a low vacancy rate (2.5%). This encouraging dynamic has led to an upward revision of profitability targets for 2024. The company is also expected to benefit from a more normalized interest rate environment.

In August 2024, LEG Immobilien issued a convertible bond of €500 million maturing in September 2030 at 1%. Two other LEG convertible bonds exist: one of €550 million maturing in June 2028 at 0.4% and another of €400 million maturing in September 2025 at 0.875%.

Comment on Impact Indicators

The impact of the portfolio is being monitored as we want to contribute positively to the development of a sustainable economy.

► Breakdown by Rating ESG

We have no securities in our portfolio with a rating below BBB.

► SDG Impact Analysis

Our proprietary Montpensier Industry Contributor method allows us to analyse the environmental and social impact of our stocks in line with the 17 UN SDGs. This month, we find that the portfolio has a particularly positive impact on SDGs 9, 12 and 8.

► Environmental performance

The portfolio's emissions are lower than the index in terms of carbon footprint and in intensity.

Select **responsible values** with a **positive impact** on the environment and society

INVESTISSABLE UNIVERSE

The approach of taking into account extra-financial criteria is a selective approach, which is based on the proprietary 4-step SRI analysis methodology developed by Montpensier Finance applied to convertible bond underlyings, with the objective of mitigating sustainability risks, without however being able to guarantee that sustainability risks are totally neutralized. The data used is mainly supplied by MSCI ESG Research and may be supplemented, modified or updated by the Management Company from other sources.

BREAKDOWN BY ESG RATING

Source Montpensier Finance / MSCI / Refinitiv

ENVIRONMENTAL PERFORMANCE

WEIGHTED AVERAGE CARBON INTENSITY Scope 1 et 2 (Tons of carbon emissions/ \$M Turnover)

CARBON FOOTPRINT Scope 1 et 2 (Tons of carbon emissions/ €M invested)*

Available data for 100.00% of M Convertibles and 99.39% of Refinitiv Europe Convertible

At the date of the report, 54 companies, that is 88.52% of funds positions, accounting for 88.60% of the invested portfolio weight, officially disclose quantitative data about their GHG emissions (Scope 1 and 2). Other data are based on MSCI ESG Research estimations.

*Under Delegated Regulation (EU) 2022/1288, starting from December 2023, the carbon footprint is standardized by EVIC (Enterprise Value + Cash). Previously, this standardization was conducted using market capitalization.
